*“Vivacious, provocative, eclectic and melodic - Electron have produced an electrifying album that’s sure to defy all negativity”, PowerPlay Magazine*

## ...the story so far:

Electron is a modern metal band based in London, hailing from Portugal. Through heavy, immersive soundscapes and raw lyrics, Electron channels the experience of feeling disconnected in a world that seems increasingly distant. Their music is a personal journey into the struggles of living on the fringe - of not fitting into the molds that society sets, of grappling with isolation, and of searching for a deeper purpose.

Channeling influences from post-grunge, metalcore and the alternative sphere, each song serves as confrontation to the pressures to conform, the relentless drive for superficial perfection, and the weight of solitude. Electron taps into these universal, existential struggles, creating a space where fans who feel lost, misunderstood, or alone can find something true, resonant, and real.

With every riff, lyric, and melody, Electron offers an invitation: to embrace your own path, reject the pressures that bind you, and discover meaning on your own terms. In Electron, fans find not only music but a place to belong.
