

# ELECTRON

## BIOGRAPHY 2023

*“Vivacious, provocative, eclectic and melodic - Electron have produced an electrifying album that’s sure to defy all negativity”, PowerPlay Magazine*

### The Story so far:

We are Electron, a Metal band hailing from London, UK. The band was formed in 2022, and our sound can be described as a mix between riff driven metal, soaring dark grungy melodies, with a modern metal twist. Our first three singles received critical acclaim, both on a national level and internationally.

We have been fortunate to have acquired a consistent presence across major national radios, magazines, and in four Spotify Editorial Playlists. All our music has been played in Total Rock’s Black Diamond Metal Mayhem show, and we also have been featured in Hard Rock Hell Radio, Bravewords, Metal Noise, Emerging Rock Bands Radio, among others.

Our mission is to keep pushing the boundaries and making music that moves our fans. The debut album ‘Defiance’, is an expression of our commitment to breaking away from our past and forging a new future - full of creativity and passion.
