

ELECTRON

“Vivacious, provocative, eclectic and melodic - Electron have produced an electrifying album that’s sure to defy all negativity”, [PowerPlay Magazine](#)

...the story so far:

Electron is a nu-metal band from London, UK, formed in 2022. Their unique sound blends riff-driven metal, dark, soaring grunge melodies, and a modern metal twist. Their debut album, *Defiance*, has received critical acclaim both in the UK and internationally, earning them a spot on major radio stations, magazines, and Spotify Editorial Playlists.

Following the release of *Defiance*, the band embarked on a successful UK tour, culminating in a memorable show supporting prog rock legends King Buffalo in Brighton. Their growing momentum led to a collaboration with Grammy Award-nominated producer Romesh Dodangoda, resulting in their 5-track EP *Hollow*, a dark, introspective project that touches on themes of self-reflection and societal pressure.

The EP’s standout track, “The Unbound,” has garnered over 600,000 views on its music video, while the EP itself has accumulated more than 90,000 Spotify streams since its release in May. Electron continues to captivate audiences, with their debut album reaching over 250,000 streams.

Electron is proudly supported by Blackstar Amplification, EMG Pickups, and Knaggs Guitars.

Will you dare to look in the mirror and confront the reflection they challenge you to see?
